

WHERE TO WATCH THE SOLAR ECLIPSE ONLINE

MON, AUG 21, 2:57 PM

NASA.GOV

NASA.gov/eclipselive will stream 10 live webcasts, each with a different angle. See the eclipse from the International Space Station. Watch ground footage from the point of greatest eclipse outside Hopkinsville, Kentucky. Catch the view from 11 international spacecraft. Or watch the eclipse from near-space: NASA Space Grant Consortium volunteers are launching 57 high-altitude balloons across the nation, each with its own Raspberry Pi camera.

NASA expects 100-500 million site hits, so as a backup, you can also catch the balloon webcast here: eclipse.stream.live

SOCIAL MEDIA

200 million Americans live within a day's drive of totality, so the Great American Eclipse will be all over Twitter, Instagram, and Facebook. The official hashtag is #eclipse2017. As soon as the event is over, Eclipse Megamovie will compile everyone's smartphone footage into a continuous video showing the solar eclipse from start to finish. Watch their replay here: <https://eclipsemega.movie>

ASTRONOMY.COM

See what the eclipse looks like on the ground from Denver, Colorado.
